

FastSheets Platform Guide

2026-08-19 | <https://sheets.fastsmc.com>

FastSheets is an open-source **spreadsheet** built with — a server-side, HTMX-driven port of the core of . Python-first, no JavaScript framework: an **editable grid with a real formula engine** (SUM, AVERAGE, MIN, MAX, COUNT, PRODUCT, cell refs, arithmetic, percentages), multiple sheets, and an AI assistant

Model the business without losing control of the model.

The screenshot displays the Fast Sheets web application. On the left is a sidebar with a '+ New sheet' button and a list of 'YOUR SHEETS' including 'Q1 Budget' and 'Sales Commission'. The main area shows a spreadsheet titled 'Q1 Budget' with a formula bar containing '=SUM(E2:E6)'. The spreadsheet data is as follows:

	A	B	C	D	E	F
1	Category	Jan	Feb	Mar	Q1 Total	
2	Salaries	42000	42000	43500	127500	
3	Marketing	8000	12000	9500	29500	
4	Software	3200	3200	3800	10200	

On the right side of the interface is an 'AI Assistant' panel with a 'New' button and a text input area for asking questions about the sheets, totals, or formulas.
